DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/1/03 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 64 and 85 are rejected under 35 U.S.C. 102(b) as being anticipated by Pribe, U.S. Patent 5,802,720.

Pribe discloses the same invention as claimed including, for example, a substantially planar substrate as shown in Figures 7A-8 (70 or 74 or 78 or 84) with at least 10 micro-blades connected to said substrate.

As to claim 85, each blade is mounted separately as shown, e.g. in Figures 7A-8.

As to claim 86, the blades are arranged in columns and rows, e.g. in Figures 7A-

8.

As to claim 87, the blades are arranged in staggered columns and rows as shown, e.g., in Figures 7A-8.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 65-69 are rejected under 35 U.S.C. 102(b) as anticipated by Pribe or, in the alternative, under 35 U.S.C. 103(a) as obvious over Pribe as set forth in paragraph 5 of paper number 12.

Response to Arguments

6. Applicant's arguments filed 7/1/03 have been fully considered but they are not persuasive.

Applicant contends that Pribe is made up of flexible material and therefore it is not or teaches away from a substantially planar substrate. However, the examiner respectfully disagrees. All of the Figures 7A, 7B, 7C and 8 all show embodiments or situations in which the blades are mounted on substantially planar substrates. Nothing in the claim is limited to rigid structures.

7. For the reasons above, the grounds of rejection are deemed proper.
